

## Photograph Your Cat Like a Pro

**Learn how to take great pictures that capture your cat's personality.**

*By Stacy N. Hackett*

Evita, a former show cat, knows she draws attention when she walks into a room. She seems to expect the flash of cameras and poses like a diva. Capturing beautiful images of her on film — or on the digital screen — is a snap. Carson, on the other hand, avoids the camera like an actor ducking the paparazzi. Pictures of him are fuzzy, with glowing eyes and parts cut off. You might have similar photos of your own cats. But you can encourage a reluctant cat to participate in your photography efforts, so you can capture high-quality images to enjoy for years to come.
