

## Nutrition for a Happy, Healthy Cat

**Here's help sorting out what organic, natural and raw diets mean for your feline friends.**

*By Kim Campbell Thornton*

From organic kibble and canned food to commercial raw diets and even homemade meals, cat lovers have more and better options for feeding their pets than ever before. People who select healthy food for themselves want the same choices for their cats, and pet food manufacturers have responded with gusto, creating diets that are labeled natural, organic or human-grade.

But it's not always easy to interpret cat food labels. What do the terms natural, organic and human-grade mean? Is raw or homemade really better? Here's what you need to know about natural foods for your cat.
