

Chats With Cats

Celia Haddon explains how cat owners can read their pets minds.

A flick of the tail. A twist of the ear. A plaintive meow. Cats have a range of gestures, meows and body movements that help them express their wants and needs. In *Chats With Cats: How to Read Your Cats Mind*, Celia Haddon unlocks the mystery behind a cats language to help owners better understand what their pets are trying to say.

Haddon writes the 192-page book with imaginary conversations owners might have with their cats if humans and cats shared the same language. In doing so, she shows owners how to better understand their cats mysterious nature and how to figure out their pets likes and dislikes.

Chats With Cats also looks at the cats ancestry and explores what motivates a cats predatory and territorial behavior. Haddon explains how any owner can solve behavioral problems and even train a cat.

Chats With Cats: How to Read Your Cats Mind is published by Trafalgar Square. Haddon is also the author of *100 Ways for a Cat to Train Its Human*. Posted: July 7, 2006, 5:00 a.m. EST
