Again, you are on the right track wanting to find a diet that she can tolerate. I would think that the Wellness diet is fine, as long as she is doing well on it. However, I have had a great deal of success in such cases as this by simply placing animals on hypoallergenic veterinary diets. In addition, using medicines that control intestinal inflammation can sometimes be helpful on a trial basis if a definitive diagnosis cannot be pursued right away.

I know that getting to the bottom of such problems can seem a bit daunting; however, I know this lucky and well-loved kitty is blessed to be in your home.
